

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims

1. (Currently Amended) A speaker unit for use in a motor vehicle, comprising:

at least one speaker having a chassis; and

at least one light source, said at least one light source being installed in the chassis of a speaker outside of the diaphragm and at least one light source is electrically connected to the direct-current network on board the motor vehicle.

2. (Original) The speaker unit according to claim 1, wherein the light source is screwed into the chassis.

3. (Original) The speaker unit according to claim 1, wherein the light source is soldered into the chassis.

4. (Original) The speaker unit according to claim 1, further comprising a single electrical intersection with the vehicle circuit.

5. (Original) The speaker unit according to claim 1, wherein the light source is arranged parallel to the axis of a speaker.

6. (Original) The speaker unit according to claim 1, wherein the light source is arranged perpendicular to the axis of a speaker.

7. (Original) The speaker unit according to claim 1, wherein said at least one light source is followed by a dispersion disk.

8. (Original) The speaker unit according to claim 1, wherein said at least one light source is a light-emitting diode.

9. (Original) The speaker unit according to claim 8, further comprising a light transmissive material adjacent the light emitting diode for allowing light to be dispersed into the interior of a vehicle.

10. (Original) The speaker unit according to claim 9, wherein the light-emitting diode and light transmissive material form one component.
